

Расшифровка номера прошивки, точнее - приложений в ней (взято с китайского форума поддержки RoadNav, перевод мой)!

Check APP

For example: S100-V1.10.7.1

1 is means the UI code (the first 1 from left) - левая цифра 1 означает версию интерфейса

10 means the module code (could be canbus or other module) - 10 означает код модуля (кан-шины или другого модуля)

7 means the bug-upgrade code - 7 означает код исправления ошибок

1 means the language code. - 1 значит код языка

V1.10.7.1 does NOT mean the version is newer than V1.7.9.0. (V1.10.7.1 НЕ новее, чем V1.7.9.0)

V1.10.7.1 and V1.7.9.0 means UI same, canbus programe different, language different.

(V1.10.7.1 и V1.7.9.0 означают один и тот же интерфейс, разные программы для кан-модуля, разный язык)

Actually V1.7.9.0 is higher version than V1.10.7.1 because the bug is upgraded.

(На самом деле V1.7.9.0 - это версия выше, чем V1.10.7.1, потому что здесь пофиксены баги)
